
40-fact patches on MoE layers 14,15 (the FSA patches are the ones that score 100% / 100% on the standard test). Bars = mean over seeds, rings = individual seeds (2 per method; pronoun probe 1 per method). Held-out free generation; the three phrasings per fact are not independent items. Both methods are near 0% on questions that need two facts in one answer under the strict scorer. Tuned recipes per method (rehearsal and penalty strengths differ).
